Landlord Installation Authorization

Dear Property Owner or Manager,

Your tenant _____ (Company Name)
Located at _____ (Address) has signed a
contract for service provided by Company Name, which is contingent on your approval of the described
installation. Please review this information and direct all questions to _____, your tenant's
Company Name representative.

This document outlines the installation process for building owners and managers. A Company Name
network technician will coordinate with the tenant or yourself for building access for a pre-installation
site survey and installation.

The equipment will not be mounted directly to the roof or building without building landlord/owner
authorization. The Company Name technician will coordinate the install to assure that the proposed
equipment installation does not conflict with any building codes or other services provided to the
building.

Once the pre-survey and coordination is completed, your tenant will be scheduled for installation.

The signer below agrees to cooperate with Company Name to facilitate delivery of services to the
building.
